The coverage of Indian science and technology (S&T) periodicals in major international indexing and abstracting (I&A) services has been studied. It is found that about 1200 Indian S&T journals are being covered by at least one of the international I&A services and over 300 S&T journals are openly accessible. However, coverage of Indian S&T journals by major citation databases, Web of Science (WoS) & Scopus is relatively poor. The newly launched Indian Citation Index (ICI) promises to cover more Indian journals.

Keywords: Indian S&T journals, indexing & abstracting services, citation measure, impact factor

Introduction

India is the world's second fastest growing economy only next to China, with a large R & D infrastructure. According to a recent report of Ernst & Young, India's current higher education spending is estimated at Rs. 4,620 billion and projected to grow over Rs. 232,00 billion by 2020, with an average growth rate of 18% per annum¹. A large number of periodicals, diverse in form, variegated in quality and national and international in scope are being published from India. In the field of science and technology alone, India at present produces around 2400 scholarly periodicals in English and regional languages as seen from Directory of STM Journals (2010) prepared by Indian Council of Medical Research². It has been found from ISSN source data of NISCAIR that in the last decade, the growth of Indian journals is more than 600%³. Though there is proliferation of new periodicals, no comprehensive study has been carried out on the representation of Indian origin S&T periodicals in international databases after 1990⁴. The present study covers fifteen databases embracing all major subject areas. The databases selected for the purpose are *Chemical Abstract Services (CAS)*, *INSPEC*, *Compendex*, *Biological Preview*, *CAB Abstracts*,

Zoological Record, *Excerpta Medica/Embase*, *Medline*, *Index Copernicus*, *Mathematical Reviews*, *Zentralblatt MATH*, *INIS*, *GeoBase* along with two citation databases *Scopus* and *Science Citation Index Expanded (SCI-E)* besides *DOAJ* to understand the new open access phenomenon.

Objectives of the study

- To explore the trends in coverage of Indian origin S&T periodicals in major international indexing/ abstracting (I&A) databases; and
- To compile a list of Indian journals covered by major international databases and classify the same as per DDC.

Methodology

The list of Indian origin scholarly S&T journals was taken from Directory of STM Journals and then compared with the list of journals covered by the international I&A databases selected for the purpose. Of the 15 databases, *Mathematical Reviews*, *Zentralblatt Math* and *INSPEC* provide information about types of coverage i.e. cover to cover coverage and partial coverage. *INSPEC* provides only names of the journals and *INIS* provides names and ISSN numbers without giving any other details of the journals. *CAS* provides two types of lists: (i) List of the journals covered through online *cas.cas.org* and (ii) *CAPlus Core Journals* list. *CAB Abstracts* also

^a Current address: C 7/3, Yamuna Vihar, Delhi - 110053

^b Current address: 80 Shivalik Apartments, Alaknanda, New Delhi-110019

provides two types of list: one is journals covered and the other - full text availability of the journals through *CAB Direct*. *Index Copernicus* provides list of journals covered with journal evaluation parameter i.e., ICV value. All these parameters were tabulated except ICV value and analysis was carried out. Then, the data regarding impact factor of journals were collected from *Journal Citation Reports* (JCR) and *SCImago Journal Rank* (SJR) indicator from *Scopus* database.

Analysis

Comparative coverage scenario

From the 15 databases selected, it has been found that a total no of 1169 journals have been covered by at least one of the 15 selected databases. The journals in the Appendix A are classified as per DDC 21st edition. The open access journals have also been indicated in the list. The list does not include 126 OA journals (i.e., registered in *DOAJ*) that are not covered by at least one of these 15 I&A services selected here. Though, most of these 126 OA journals are indexed by other national and international secondary services like *EBSCO*, *CSA*, *Academic Index*, *QSpace*, etc., as found from *Ulrich*.

When the coverage of *Indian Citation Index* (ICI), which intends to cover about 1000 Indian S & T journals, is added to the number, the total number

of Indian S & T periodicals covered by national and international secondary services goes beyond 1500. It is worth mentioning that to get national & international coverage of Indian S&T journals by secondary services, we considered ICI instead of *Indian Science Abstracts* (ISA) as the coverage of ICI is much more than ISA. ISA listed 1220 journals including some foreign journals covered in their online version⁵. But a recent study reported that ISA covered only 445 journals during the period of 2006-2008⁶.

The share of Indian journals in international I&A databases is given in Table 1.

From Table 1 it can be seen that among the databases selected, *CAS* covers largest number of Indian periodicals followed by *CAB* abstracts, whereas *GeoBase* covers least number of Indian journals followed by *Compendex & Medline*. In terms of percentage-wise coverage of Indian journals in I&A services, *Medline* occupies the lowest rank. Although India produces over 700 biomedical journals, but their representation in international I&A services is very low. On the other hand the share of mathematical journals in two most reputed mathematical databases namely *Mathematical Reviews* and *Zentralblatt Math* is quite encouraging, which is over 4.5%, next only to *CAS* and *CAB*.

Table 1—Share of Indian S&T journals in I&A Databases

Sl No.	Database (Year)	No. of journals	Indian S&T journals	Percentage (approx)
1	<i>Biosis Preview</i> (2010)	4797	97	2.02
2	<i>CAB</i> (2010)	7363	349	4.74
3	<i>CAB Direct</i> (2010)	502	67	13.35
4	<i>CAPlus Core</i> (2010)	1626	20	1.23
5	<i>CAS</i> (2010)	10000+	652	Less than 6.52
6	<i>Compendex</i> (2010)	3214	37	1.15
7	<i>DOAJ</i> (2010)	6252	287	4.59
8	<i>Embase</i> (Mar 2010)	7462	123	1.65
9	<i>GeoBase</i> (2010)	2131	30	1.4
10	<i>Index Copernicus</i> (2009)	2520	129	5.12
11	<i>INSPEC</i> (2009)	4095	59 (FT-9)	1.44
12	<i>Mathematical Reviews</i> (2010)	2600(approx)	122 (FT -56)	4.69
13	<i>Medline</i> (2010)	5419	38	0.7
14	<i>SCI-E</i> (2010)	8254	102	1.24
15	<i>Scopus</i> (2010)	18931	247	1.3
16	<i>Zentralblatt</i> (2010)	3500 (approx)	162 (FT - 63)	4.63
17	<i>Zoological Record</i> (2010)	4600	97	2.11

* FT – Cover to Cover Coverage

** Additional 17 Indian S&T Journals have been found as open access journal but not in the list of *DOAJ*

Recency in coverage

Of the 15 databases selected, except *INIS* and *INSPEC*, all provided up-to-date list. *INIS* and *INSPEC* have listed several journals that have ceased publication or bifurcated or the name of the journal has changed. *Zentralblatt Math* and *Mathematical Reviews* are very quick in noticing the new Indian S&T journals. They included several Indian journals born in 2009 in the year 2010 itself. Of the remaining databases, *CAS* is relatively quick in noticing the new Indian S&T periodicals. Some Indian periodicals that started publishing in 2008 and 2009 have been included in their database. But these periodicals are either OA journals (e.g. *International Journal of PharmTech Research*) or they are published by the major publishers like Trade Science Inc some of whose journals are already being covered by *CAS*. The remaining databases are quite late and sometimes take even a decade to notice new Indian periodicals.

Coverage trends in citation databases

The coverage of Indian journals in international citation indexes namely the *SCI-Expanded* and the *Scopus* is given in Table 2.

Scopus covers majority of Indian journals from health and biomedical sciences followed by physical science and engineering science. The coverage is least from mathematical science. This trend is almost the same in case of *SCI-E* which covers only three journals from mathematics. Though, it is found that both *Mathematical Reviews* & *Zentralblatt Math* cover a total of 181 journals, out of which 33 full text covered journals are common in both. Here, it is also to be noted that *CAS* service has designated 20 Indian journals as core journals in the *CA Plus* core journal list, but only 12 of them find a place in *Scopus* and 11 of them in *SCI-E* and 10 are common in both the databases.

Table 3 gives the number of Indian journals covered in *SCI* or *SCI-E* during 1995 to 2010.

From the above, it is seen that there is a rise in the coverage of Indian journals in *SCI-E* in recent years, but the share of Indian journals never went beyond 1.3%. Except the last three years, the share of Indian journals is always below 1%. Larger coverage of journals in citation index leads to higher impact factor^{8,9}. It can be safely argued that under-

Table 2—Coverage of Indian S&T Journals in *Scopus* and *SCI Expanded* during 2007-2010

Year	No. of Indian S&T journals in SCOPUS	No. of Indian S&T journals in SCI-E	No. of Common journals in SCOPUS & SCI-E	No. of unique journals in SCOPUS	No. of unique journals in SCI-E	No. of Indian S&T journals either in the SCOPUS or SCI-E
2010	2009 list + 13 = 247	2009 list -2 + 11 = 103	84	163	19	266

2009	9	94	7907	1.188
2010	10	103	8254 *	1.248

Source: *JCR & WoS*

* As per the Thomson Reuters blog, *SCIE* covered 6222 journals in 2000, 6997 in 2005 and 8058 in 2010 (ThomsonReuter⁷)

From Table 4 it is quite clear that with the increasing coverage of Indian journals in *SCI-E*, JCR-IF of our journals increased substantially. For instance three of our journals in 2009 and four in 2008 have crossed JCR-IF of 1.00. Some journals like *Allelopathy Journal*, *Journal of Biosciences*, *Indian Paediatrics*, *Indian Journal of Medical Research*, *Journal of Earth System Science* have almost consistently registered an increase in the JCR-IF. It is also noteworthy that the recent phenomenon like open access might have contributed positively in this direction.

If we look at the SJR indicator, we find that many of our journals are doing comparatively better but not included in JCR. SJR is derived from Scopus citation data with the application of sophisticated page ranking type algorithm in this network of journals. Since *Scopus* includes a substantially larger collection of journals originating from more countries and SJR algorithm allows the estimation of journal's impact without the influence of self citation, it can be safely assumed that SJR indicator provides a more comprehensive value for journals¹⁰.

If we compare the SJR indicator with that of JCR-IF we see that

a) In 2007, SJR indicator provides ranking for 172 Indian journals whereas JCR-IF for that year included only 46 Indian journals. When we map the top 40 SJR ranked Indian journals in JCR list, it is found that our 23 SJR ranked are not in JCR list of 2007.

b) In 2008, SJR and JCR covered 191 & 45 Indian journals respectively and among the top 40 SJR ranked Indian journals, only 19 have found a place in JCR list of that year.

c) In 2009, the trend is almost the same. SJR covered 191 Indian journals whereas JCR included 68 Indian journals and among the top listed 40 Indian journals in SJR, 21 were absent from JCR 2009.

Conclusion

While in 1990s, about 500 S&T periodicals were being covered by major I&A services, today about 1200 S&T journals are being covered. At present, about 300 open access journals are being published from India. The visibility of Indian journals in global knowledge community is also increasing substantially. Before the advent of *Scopus*, *SCI* was the sole authoritative tool for bibliometric

evaluation of scholarly journals. But, *SCI* lacks comprehensiveness in terms of coverage across the disciplines and types of publications¹¹. When *Scopus* appeared in 2004 with a substantially larger coverage and gave tuned weightage-based ranking of journals through open access SJR, we have an alternative. But still, there are many journals which are doing well as seen from the coverage of other international I&A services but not included in either of Scopus or Web of Science. The Indian Citation Index, when fully developed should help us to determine the more realistic impact of our journals.

Acknowledgements

The authors are grateful to Ms. V V Lakshmi (Head, NSL, NISCAIR) for helping in collecting data relating to *SCI-E* coverage and impact factors of Indian journals.
